

## Skills:

- Programming Languages: Python, Java, Classic ASP, Php, CodeIgniter
- Web Technologies: Django, Django REST Framework, Flask, ReactJS, Ajax, CSS, TypeScript, HTML, Azure Devops, Tailwind CSS, Bootstrap, WordPress, WordPress Short Codes
- Databases: SQL, MySQL, SQLite3, Firebase, Supabase,
- Frameworks: PyQt5, Django, Flask
- Web Scraping: Beautiful Soup
- Version Control: Git, GitHub

---

## Experience: Systems Development / Web Developer

### Projects

- Blood Donation System: Developed a web-based system that allows users to view available blood supplies based on their location.
- Transcript and Translation System: Created a system that enables users to upload audio files and automatically transcribes them using Python NLTK, JS, and APIs.
- Store Finder System: Designed and implemented a system to assist farmers in locating stores with the most affordable options.
- sPicker: Developed an application that suggests recipes based on user preferences.
- ChickaChat: Engineered a social media app that allows users to share thoughts and confessions anonymously without fear of judgment.
- UrlShortner (Django): Developed a web application using Django and Django REST framework to create a user-friendly URL shortening service. This project allows users to convert long URLs into shorter, more manageable links.

## Experience

- **Full Stack Web Developer *Cloudshift.net*,**  
*Freelance March 2023 – Present Canada, Remote*
  - Help product development with AI components.\
  - Developing Reacting component with JavaScript Framework
  - Implemented agile methodologies, contributing to successful project outcomes and adaptability within the team.
- **Full Stack Web Developer *Buzzerboy*,**  
*Freelance Sep 2023 – Present Canada, Remote*
  - Lead the development of Django projects, showcasing expertise in Python, Django, and modern web technologies.
  - Effectively managed databases, designed RESTful APIs, and created seamless user experiences.
  - Streamlined project management and deployment using Azure DevOps, ensuring efficient project execution.
  - Implemented agile methodologies, contributing to successful project outcomes and adaptability within the team.
- **Python Developer**  
*Freelance Jan 2023 - August 2023 Remote*
  - Pioneered an innovative voice-over application, redefining the voice-over landscape.
  - Provided users with customization options and a user-centric recording process.
  - Leveraged Python, PyQt5, and Natural Language Processing (NLP) to empower linguistic enhancements.
  - Crafted a seamless, multithreaded application, enhancing responsiveness and user satisfaction.

- **Freelance Layout Artist, since 2018**
    - Provided professional layout design services using Adobe Creative Suite, including InDesign, Photoshop, and Illustrator, to create visually appealing materials.
- 

#### **Additional Skills:**

- Database Design
- Systems Analysis
- Server Application and Client Interface Design using Python and Django
- Progress Tracking and Documentation of Python Projects

#### **Education & Certifications:**

- BS Information Technology – Central Mindanao University (*present*)
- Python Programming: Object Oriented Design – LinkedIn
- Python Essential Training – LinkedIn

#### **Languages:**

- English
- Tagalog

#### **Social:**

- **GitHub:** [github.com/XmyKhnnt](https://github.com/XmyKhnnt)
  - **Linkedin:** [/in/khent/](https://www.linkedin.com/in/khent/)
- 

#### **Summary**

Highly skilled Python and Django developer with a strong background in systems development and a passion for creating innovative solutions. Proficient in front-end technologies such as Ajax, CSS, and HTML, and experienced in utilizing Django, Django REST Framework, and Python's object-oriented programming (OOP) principles. Solid knowledge of SQL databases including MySQL and SQLite3. Adept at analyzing existing systems and business rules to drive improvements. Excellent problem-solving abilities and a commitment to producing high-quality code.
